

Helix RoHS and REACH Product Declaration

Helix supports the goals of RoHS and REACH which are consistent with our own commitment towards responsible use and handling of chemicals and restriction of hazardous materials.

It is Helix's policy that all of its suppliers comply with the standards of Restriction of Hazardous Substances (RoHS), Directive 2011/65/EU and Registration, Evaluation, Authorization, and restriction of Chemicals (REACH), Regulation EC/1907/2006. Helix outsources its wafer fabrication, packaging assembly and test to its partner suppliers. Because Helix does not produce any of its products in-house, compliance must be by its suppliers.

Helix assures compliance to RoHS and REACH standards through controlled documentation review, required testing and internal audits.

It is to the best of our knowledge that our suppliers are in full compliance to the RoHS and REACH standards through their declarations, certificates, test reports and requested information that has been provided as part of our assurance checks.

A handwritten signature in black ink, appearing to read 'Randy Hull', is displayed on a light gray rectangular background.
